

Put the Power of EnergyAdvantage® into Action

For nearly two decades, MidAmerican Energy has helped municipalities save some green with its innovative EnergyAdvantage programs. Partnering with MidAmerican can lower energy costs on a large scale, leaving more money for infrastructure.

Through free on-site energy audits, MidAmerican can help identify energy inefficiencies in city buildings that are wasting money unnecessarily, and offer cost-effective ways to rectify the problems. Then, with cost-saving rebates, MidAmerican helps cities enjoy state-of-the-art energy efficiencies now, including improved performance and significantly lower energy costs.

- Curtailment
- BusinessCheck®
- Nonresidential Energy Analysis/
EfficiencyPartners®
- Nonresidential Equipment Rebates
 - Lighting
 - Heating and Cooling
 - Commercial Kitchen
 - Building Shell
 - Motors & Variable-Speed Drives

"MidAmerican explained the cost savings the fire department would see by retrofitting from T-12 to T-8 lighting. We did that and replaced two old furnaces with one energy efficient one. The lighting rebates are awesome—it's almost a no-brainer. The money we get back pays for probably 75 percent of the costs."

**– Scott Van Dusen, Ida Grove
Second Foreman, Fire Department**

"The rebates we received were very helpful in getting the best equipment possible for the money. The programs allowed us to do some updates we wouldn't have been able to do. It's always great working with MidAmerican Energy—they're a wonderful partner for the city."

**– Mark Arentsen, Bondurant
City Administrator**

"Through the program we replaced lighting in many of the city buildings including the disposal plant, machine shop and water plant. We were very happy with the entire process and will be seeing the payoff soon. I would recommend MidAmerican's programs to anybody."

**–Steve Stetzel, Audubon
Zoning Administrator**
