

Put the Power of EnergyAdvantage[®] to Work for Education

For nearly two decades, MidAmerican Energy has helped school districts save some green with its innovative EnergyAdvantage programs. Partnering with MidAmerican can lower energy costs on a large scale, leaving more money for learning.

Through free on-site energy audits, MidAmerican can help identify energy inefficiencies that are costing school districts money, and offer cost-effective ways to rectify the problems. Then, with cost-saving rebates, MidAmerican helps schools achieve state-of-the-art energy efficiencies now, including improved performance and significantly lower energy costs.

EnergyAdvantage Programs

- Custom Systems
- Commercial New Construction
- Multifamily Housing
- Efficiency Bid[®]
- Curtailment
- BusinessCheck[®]
- Nonresidential Energy Analysis/
EfficiencyPartners[®]
- Nonresidential Equipment Rebates
 - Lighting
 - Heating and Cooling
 - Commercial Kitchen
 - Building Shell
 - Motors & Variable-Speed Drives

"We did an energy audit at the high school, looking at the lighting, heating, air conditioning, windows, doors, insulation—everything. Through the program we're getting rid of our boilers and going geothermal. We're also getting new energy-saving lights, windows and exterior doors. The experience has been very good, saving the school a good amount of money now and over time."

**– Marlin Smith, Hampton-Dumont
Director, Buildings/Grounds**

"We retrofitted the entire school district with T-8 lighting and new ballasts. We received a very good rebate, making it an especially good program for schools to help pay for things while budgets are tight these days."

**– Scott Anderson, Griswold
Head Custodian**

"MidAmerican lets us know of extra things we can do that will make a difference. For instance, since 2004 all buildings are geothermal. It's truly a no-brainer for schools not to participate in the programs."

**– Tim Kline, Johnston
Assistant Director, Buildings/Grounds**
