

2009 Iowa EnergyAdvantage® Financing Program – Windows

Helping you increase the energy efficiency and comfort of your home in Iowa.

A window's purpose is to allow light to pass, not allow conditioned air to escape or outside air to infiltrate.

In many homes, one of the most common causes of energy inefficiency

is air leaks through existing windows.

Replacing windows in an existing home, however, can be prohibitively costly.

The EnergyAdvantage® Financing – Windows program, through MidAmerican Energy Company and First American Bank, is available to Iowa residential customers for purchasing and installing qualifying high-efficiency windows when MidAmerican supplies their primary heating energy. The loan approval process is designed to be quick and easy, with loan approval typically occurring within one day. Iowa residential customers may choose from competitive interest rate financing, fixed for the term of the loan or six months same-as-cash. Financing applications must be completed no later than three months following window installation.

Not All Windows Are Created Equal

Before choosing windows, it is important to ensure that they meet the standards of energy efficiency set by MidAmerican. Customers should call 800-894-9599 to verify the eligibility of the windows they are considering. Windows must bear the National Fenestration Rating Council label to be considered certified. MidAmerican will verify efficiencies of

windows, using the most recent editions of the NFRC certification directory. Customers must retain all NFRC labels until windows are verified or loan is closed. As part of the loan documentation, one NFRC label must be submitted with the invoice for each style of window and patio door that is being installed. Windows must be installed by a window dealer recognized by MidAmerican, and all windows must include a new frame. Sash-only replacement is not eligible for EnergyAdvantage financing. Professionally manufactured low-E windows must meet a minimum NFRC rating of .35 or lower U-factor.

DISCLAIMER: MidAmerican does not guarantee that installation and operation of energy-efficient equipment will result in reduced usage or in cost savings. The manner in which a customer uses and maintains energy-efficient equipment affects potential cost savings. MidAmerican makes no warranties, expressed or implied, with respect to any equipment purchased or installed, including, but not limited to, any warranty of merchantability or fitness for a particular purpose. In no event shall MidAmerican be held liable for any incidental or consequential damages or injuries resulting from defective equipment or installation. MidAmerican reserves the right to cancel or change these programs at any time. MidAmerican's acceptance of this application does not guarantee acceptance of financing. All credit decisions are made by First American Bank.
