

Notification of Closure of CCR Units
MidAmerican Energy Company – Walter Scott, Jr. Energy Center
North-South CCR Surface Impoundment
IDNR Permit #78-SDP-33-16C

I certify, as a Professional Engineer in the State of Iowa, that the North-South CCR Surface Impoundment at Walter Scott Jr. Energy Center was closed in accordance with 40 CFR 257.102(d). The CCR from the former South Impoundment and a portion of the former North Impoundment was removed and consolidated into the North Impoundment. The CCR in the North Impoundment was capped with an alternative final cover system in accordance with 40 CFR 257.102(d)(3)(ii). This certification is being provided as requirement of 40 CFR 257.102(f)(3).

The construction activities were completed on April 30, 2024, in accordance with the following documents:

- Closure Plan dated March 10, 2020, that is posted on the MidAmerican Energy Company public CCR website.
- Burns & McDonnell Construction Plans, originally dated November 12, 2019, and all revisions.
- Burns & McDonnell Technical Specification, originally dated May 12, 2020, and all revisions.
- Final Construction Quality Assurance (CQA) Report dated June 06, 2024.
