

## ENERGIZING FUTURE GENERATIONS

**A**t MidAmerican Energy, we're proud to support educational efforts that help ensure today's students have the knowledge and resources they need to solve tomorrow's complex problems.

### IMPACTING HIGHER EDUCATION

To help prepare the next generation of line workers in Iowa, we partnered with Des Moines Area Community College (DMACC) to develop a new electric line program curriculum. Fourteen students graduated in the program's first year, and enrollment for its second year has more than doubled. This new opportunity gives students the knowledge and experience to enjoy thriving careers at companies like MidAmerican.

### EMPOWERING THE NEXT GENERATION

This spring, we welcomed more than 100 students and teachers to EmpowHER — a female-focused, open-house style career exploration event. Junior high and high school students from around central Iowa visited our Training Center for Excellence to interact with women who have successful careers in the energy industry. MidAmerican women leaders — including a panel of department managers and executives — also shared their expertise, experiences and advice with the next generation of professionals.

### SUPPORTING FUTURE INNOVATION

It's never too early to encourage kids to explore STEM-focused subjects, which is why we partner with organizations like Junior Achievement, Avenue Scholars and FIRST Tech Challenge. These programs equip students with the tools they need for their future career endeavors.

### INTERESTED IN BEING A PART OF THE ENERGY INDUSTRY?

Find opportunities with us at [MidAmericanEnergy.com/careers](https://www.midamericanelectric.com/careers).

## WRAPPING UP SUMMER WITH

# SAVINGS

As summer turns to fall, we want to help you save energy and money — no matter the season! Follow these tips and best practices to help reduce your energy use and lower your monthly bill.

**Keep it closed** — Close shades or drapes during hot days to block the sun and naturally cool your home.

**Keep it clear** — Ensure full air circulation in your home by keeping your registers clear of furniture and other obstructions.

**Keep it counterclockwise** — Avoid cranking up the air conditioner and set your ceiling fan to spin counterclockwise during the summer to push cool air down.

### Plus, Iowa and Illinois customers can take advantage of our money-saving programs, discounts and rebates!

When you use less energy, it saves you money — and we want to help you keep costs even lower! Based on your energy needs and habits, you can save anywhere from a few dollars each month to hundreds of dollars every year.

Our Instant Discounts and rebate offerings make it easier to upgrade your home equipment to energy-efficient models. You can also find deals on smart thermostats on our online marketplace. And, don't forget to save even more with federal tax credits and rebates available through the Department of Energy's (DOE) Energy Savings Hub at [energy.gov/save!](https://energy.gov/save!)

To see which savings programs and opportunities you qualify for, visit [MidAmericanEnergy.com/ee](https://MidAmericanEnergy.com/ee) or call **877-932-0616**.

## DID YOU KNOW? OUR ELECTRIC RATES ARE 42% BELOW THE NATIONAL AVERAGE

At MidAmerican, we are dedicated to keeping our customers' energy affordable! According to the U.S. Energy Information Administration (EIA), our Iowa electric rates are 42% below the national average, which makes our rates the 9th-lowest of all investor-owned utilities in the U.S.
