

**STANDARDS OF CONDUCT POSTING
18 C.F.R. §358.7(a)(1)**

**Disclosures of Non-Public Transmission Function Information to
MidAmerican Energy Company Marketing Function Employees**

On May 1, 2012, the fact that a capacitor bank located at MidAmerican's Forest and Vermont Substation located in Des Moines, Iowa is out of service and has been unavailable for a number of weeks was inadvertently disclosed in a training session that included MidAmerican marketing function employees. Discussion of the topic was immediately terminated after this disclosure. Within thirty (30) minutes, this information was posted and made publicly available in a similar fashion to all other MidAmerican Energy Company outage information on the Midwest Independent Transmission System Operator, Inc. outage database. This notice is posted in addition to the public disclosure of this information on the MISO website.
