

APRIL-DECEMBER 2019 IOWA

ENERGY EFFICIENCY REBATE INFORMATION FOR YOUR BUSINESS

Equipment must be purchased, installed and operating between April 1, 2019, and Dec. 31, 2019, prior to submission of rebate application. Rebate applications for equipment/material purchased must be submitted within 90 days of dealer invoice or by Jan. 31, 2020, whichever comes first. Rebates are issued on a first-come, first-served basis. Applications can be submitted via email at rebateapplications@midamerican.com.

For prescriptive rebates, the rebate payment cannot exceed 50 percent of the installed cost (reasonable labor and material/equipment - reasonableness to be determined by MidAmerican Energy Company). Installed cost includes contractor labor only and does not include internal labor.

Equipment not listed for prescriptive rebates may qualify for a rebate under Nonresidential Energy Solutions. These custom projects must be preapproved by MidAmerican Energy prior to purchase and installation of equipment or systems. Projects must be completed within six months of preapproval.

Commercial new construction projects are not eligible for prescriptive rebates through the Nonresidential Equipment program. All commercial new construction projects must participate in the Commercial New Construction program in order to receive rebates.

Nonresidential Energy Solutions

The Nonresidential Energy Solutions program promotes comprehensive energy efficiency for existing commercial buildings and industrial facilities through two offerings: small business express and direct project assistance. These offerings are tailored to the unique needs of nonresidential customers by size and purpose. This program also will serve agriculture and market-rate multifamily customers.

Custom incentives based on first-year savings and calculated according to improvements made.

- | | |
|------------------------------------|-------------------|
| Electric improvements: | Gas improvements: |
| ▪ HVAC – \$0.12/kWh saved | ▪ \$1/therm |
| ▪ Lighting – \$0.10/kWh saved | |
| ▪ Process/other – \$0.08/kWh saved | |

Commercial New Construction

The Commercial New Construction program provides complimentary energy design assistance and financial incentives to help offset the cost of implementing energy-efficient strategies. Qualifying projects include: New construction, an addition or a major renovation with mechanical system replacement; early enough in the design process to implement energy analysis results; larger than 5,000 square feet; heated and/or cooled by a participating Iowa utility; able to achieve electric savings that are at least 5 percent better than energy code baseline.

Project incentives (electric incentives only) are capped at 50 percent of total bundle incremental cost, cannot buy down a project below a one-year simple payback, or exceed \$200,000 per building.

Incentives include:

- Free design assistance
- Design team and construction incentives
