

NONRESIDENTIAL ENERGY SOLUTIONS

2022 ILLINOIS PROJECT INSTALLATION NOTICE

Fill out form completely and sign. Attach itemized invoices and supporting documentation. Failure to complete this form and provide the requested project documentation will result in denial of the project application. Please call MidAmerican Energy at 800-432-8583 or email nes@midamerican.com with questions.

Before signing and submitting this application, please review the [Qualifications and Conditions](#) located at the end of this document or online at www.MidAmericanEnergy.com/ee.

Please allow four weeks for incentive processing.

The following documentation is required and must be included with this project installation notice:

- Equipment cut sheet/manufacturer specification sheet for all equipment installed as part of the project.
- Copy of invoice(s) for the purchase and installation of equipment. Invoice(s) must be dated and must match the indicated final project cost. Invoice(s) must include the installation location or business name.
- Key Input and Assumption (KIA) table, if applicable.

Submit completed applications using one of the following methods:

Email: nes@midamerican.com

Mail: MidAmerican Energy Company
PO Box 8439
Des Moines, IA 50301

Disclaimer

MidAmerican Energy Company does not guarantee that installation and operation of high-efficiency equipment will result in reduced usage or in cost savings. MidAmerican Energy Company makes no warranties, expressed or implied, with respect to any equipment purchased or installed, including, but not limited to, any warranty of merchantability or fitness for a particular purpose. In no event shall MidAmerican Energy Company be held liable for any incidental or consequential damages or injuries resulting from defective equipment or installation. MidAmerican Energy Company reserves the right to cancel or change these programs at any time. MidAmerican Energy Company's acceptance of this application does not guarantee payment of rebate.

Customer Agreement (required)	
I, the undersigned, agree that to the best of my knowledge, the energy efficiency project listed herein is completely installed and operational at the project site listed in the Project Information section. I have complied with all federal, state, and local codes and regulations and MidAmerican Energy Company's qualifications and conditions. I will notify MidAmerican Energy Company immediately of any changes to the above information. I also understand that any changes in the preapproved project scope or submission of the Project Installation Notice after the preapproval expiration date may result in the recalculation of the preapproved rebate. Additional rebates in excess of the preapproved amount may be subject to availability of Program funds. I understand that MidAmerican Energy Company may conduct a post-installation inspection to verify savings. I am authorized by the customer organization listed above to submit this Project Installation Notice on its behalf.

Illinois Nonresidential Qualifications and Conditions

- Participants must be nonresidential customers (commercial or industrial) with facilities located in MidAmerican Energy Company's Illinois service territory.
- MidAmerican Energy Company must deliver the primary electricity or natural gas to the equipment at the facility for which the rebate is being paid. Additionally, heating, ventilation and air conditioning rebates may require that the primary heating fuel is delivered by MidAmerican Energy Company to the installation address.
- Qualifying equipment must be new, installed on the premises and must not be purchased for resale.
- Customers are responsible for ensuring that the equipment installed for these programs meets all applicable codes, standards and regulatory requirements.
- Equipment must be purchased between January 1, 2022, and December 31, 2022, and installed and operating prior to submission of final rebate application. Rebate applications for equipment/material purchased must be submitted within six months of dealer invoice or by December 31, 2022, whichever comes first. Applications can be submitted via email at rebateapplications@midamerican.com.
- Prescriptive rebates will be based on the rebate schedule in effect on the date of dealer invoice for the equipment/material purchased.
- Rebates are issued on a first-come, first-served basis. Rebates and incentives are offered until approved funds are exhausted or through December 31, 2022, whichever comes first.
- For prescriptive rebates, the rebate payment cannot exceed 50% of the installed cost (reasonable labor and material/equipment – reasonableness to be determined by MidAmerican Energy Company). Installed cost includes contractor labor only and does not include internal labor.
- All project installations with rebates exceeding \$20,000 will require an on-site verification of installation by either MidAmerican Energy Company, its program implementation contractor(s), or their subcontractors, prior to issuance of rebate.
- Rebate checks will be issued to the building owner or account holder.
- Allow up to 14 days for prescriptive rebate processing once application and supporting documents are received and accepted (excluding on-site verification time, if needed).
- Customers may not receive custom rebates in lieu of prescriptive rebates.
- Rebates may be subject to income tax. Consult your tax advisor for more information.
- MidAmerican Energy Company reserves the right to withhold payment or award the incentive in the form of a bill credit for customers in arrears.
- MidAmerican Energy Company, its program implementation contractors and their subcontractors reserve the right to request additional supporting documentation, if necessary, to ensure measure eligibility and verify existing system performance and baseline conditions.
- MidAmerican Energy Company, its program implementation contractors and their subcontractors reserve the right to conduct on-site verification of equipment installation, install metering devices on new equipment, and to verify sales receipts and other project documentation at any time before or after issuing a rebate.
- MidAmerican Energy Company, its program implementation contractors and their subcontractors do not endorse any particular manufacturer, product or system design in promoting this incentive program. Listing a product does not constitute an endorsement, nor does it imply that unlisted products are defective in any way.
- MidAmerican Energy Company, its program implementation contractors and their subcontractors do not guarantee that installation and operation of energy-efficient equipment will result in reduced usage or in cost savings. The manner in which a customer uses and maintains energy-efficient equipment affects potential cost savings.
- MidAmerican Energy Company, its program implementation contractors and their subcontractors make no warranties, expressed or implied, with respect to any equipment purchased or installed, including, but not limited to, any warranty of merchantability or fitness for a particular purpose.
- In no event shall MidAmerican Energy Company, its program implementation contractors or their subcontractors be held liable for any incidental or consequential damages or injuries resulting from defective equipment or installation arising out of a customer's participation in any programs.
- MidAmerican Energy Company may wish to publicize the customer's participation in the program, the results, the amount of incentives paid to the customer and any other information that reasonably relates to the customer's participation. In such instances, MidAmerican Energy Company will secure a release from the customer authorizing the business to make such information public.
- The programs are effective January 1, 2022, through December 31, 2022, unless otherwise noted, and are subject to periodic review by MidAmerican Energy Company. MidAmerican Energy Company reserves the right to modify or end these programs at any time without any notification.

Additional Custom Project Qualifications

- Custom projects require preapproval by MidAmerican Energy Company.
- After an application is preapproved by MidAmerican Energy Company, the customer will receive written notification of the preapproved incentive amount, and the energy savings measures must be fully installed within six months of preapproval to qualify for incentive payments. *Temporarily increased to 12 months of preapproval.*
- Any energy savings measures installed prior to the issuance of MidAmerican Energy Company's written authorization or preapproval will be deemed as an unauthorized installation and MidAmerican Energy Company will have no obligation to pay incentives for those energy savings measures.
- Regardless of preapproval from MidAmerican Energy Company, projects may be denied, or incentives reduced upon receipt of final project cost and scope of work documentation.
- MidAmerican Energy Company reserves the right to lower the incentive amount if the quantity and/or cost of energy savings measures actually installed by the customer differ from the preapproved project.
- For custom projects, the rebates for electric projects are \$0.08-\$0.12 per kWh of first-year savings. The rebates for natural gas projects are \$1/therm of first-year savings. Customers will receive the lesser of the calculated custom rebate or 50% of the eligible project cost, and the rebate may not reduce the simple payback for the project to less than two years. *Temporarily increased for electric projects to \$0.12-0.18 per kWh and for natural gas projects to \$1.50/therm of first-year savings and cannot exceed 70% of the eligible project cost.*
