# FOR YOUR HOME

If you are a homeowner living in Illinois and are a MidAmerican Energy Company customer, our EnergyAdvantage® programs can help reduce your energy bills and keep your home more comfortable.

## HOMECHECK®

Save money and energy, and add comfort to your home with a free on-site HomeCheck energy assessment. If your home was built before Jan. 1, 2009, and MidAmerican Energy provides its primary heating fuel, an energy expert will analyze various features of your home and may install energy-saving items at no cost. On-site HomeCheck energy assessments only will be offered until Dec. 20, 2019. Get started by calling **800-545-0762**.

## ONLINE HOME ENERGY ASSESSMENT

The online home energy assessment tool provides an overview of your energy use and energy-saving ideas right at your fingertips. Visit **MidAmericanEnergy.com/homeaudit** and log into My Account to access your MidAmerican Energy records to learn more. Personalize your online home energy assessment by updating your profile for a more customized experience.

## INSULATION

Insulation is one of the keys to a comfortable, energy-efficient home, and MidAmerican Energy can help with costs. An on-site HomeCheck energy assessment must be completed before insulation projects begin to qualify for rebates. On-site HomeCheck energy assessments only will be offered until Dec. 20, 2019. Get started by calling **800-545-0762**.

## RESIDENTIAL EQUIPMENT

Rebates are available on qualifying high-efficiency heating and cooling equipment when you replace existing equipment.

## APPLIANCE RECYCLING

Do you have an older refrigerator or freezer in your basement or garage? Or perhaps you are considering replacing your existing refrigerator or freezer. If so, rebates are available if you're a MidAmerican Energy electric customer who has a working refrigerator or freezer that you would like to recycle. Call **800-621-2757** to schedule a pick-up.

## LIGHTING

Lighting, which accounts for 12 percent of the average home's electric bill, is one of the easiest and most effective places to start saving. MidAmerican Energy can help with discounted pricing on select ENERGY STAR® certified LED purchases. Look for the Be Bright information at participating stores. Or visit **illinoisbebright.com**.

## SUMMERSAVER<sup>SM</sup>

SummerSaver is a voluntary initiative for MidAmerican Energy residential electric customers who want to help reduce energy use at peak times. An air conditioner cycling device is installed on the outside of your home. Then, from June 1 to Sept. 30, this device allows MidAmerican Energy to cycle your air conditioner on peak usage days (but never on weekends or holidays). You receive a \$40 credit on your bill for the first year of full participation and a \$30 bill credit in following years. Participation is limited and is available on a first-come, first-served basis. Customers requesting participation may be placed on a waiting list.

# FOR YOUR BUSINESS

Energy costs are a large part of the overhead of any business. If you purchase energy for your Illinois business from MidAmerican Energy Company, you can save money and energy through a variety of programs and rebates.

## COMMERCIAL ENERGY SOLUTIONS

Improve the performance of your commercial building(s), including agribusiness and multifamily housing. This program promotes comprehensive energy efficiency for existing commercial buildings regardless of size through two options: energy assessments and building optimization services. Get started by calling **800-292-6448**.

## INDUSTRIAL PARTNERS

Receive expert advice and engineering assistance to improve the energy performance of your facility and production processes. As an industrial customer, you'll receive the support you need to identify energy-saving opportunities and effectively manage a long-term energy plan. Manufacturing facilities may receive a free energy assessment and customized recommendations for energy improvements and technical assistance. For more information about this program, visit **MidAmericanEnergy.com/illinois-IP** or call **800-432-8583**.

## NONRESIDENTIAL EQUIPMENT

Rebates are available for qualifying lighting, heating and cooling equipment, motors, variable speed drives, insulation, and kitchen equipment for commercial, institutional and industrial facilities served by MidAmerican Energy. Since high-efficiency product technology always is advancing, not all qualifying equipment and systems may appear on our rebate list. If you don't see a rebate for your proposed high-efficiency equipment or systems, it may qualify under Nonresidential Equipment Custom Systems. Custom projects must be preapproved by MidAmerican Energy prior to purchase and installation of equipment or systems.

## COMMERCIAL NEW CONSTRUCTION

Make energy efficiency part of your next design. MidAmerican Energy's Commercial New Construction program provides complimentary energy design assistance and financial incentives to help offset the cost of implementing energy-efficient strategies. Give your new construction project or building renovation the right start by completing the screening form at **MidAmericanEnergy.com/illinois-CNC** or by calling **877-939-1874**.

## CURTAILMENT

This program provides large commercial and industrial customers with financial incentives to reduce energy usage during times of peak demand. Curtailment goals are designed to help manage demand for electricity between June through September, traditionally the hottest months of the year. For more information, visit **MidAmericanEnergy.com/curtailment** or call **866-584-0871**.
