

2019 ILLINOIS ENERGY EFFICIENCY REBATE INFORMATION FOR YOUR HOME

Programs are effective Jan. 1, 2019, through Dec. 31, 2019, and are subject to change. Complete program details and rebate applications are available at www.midamericanenergy.com/ee. **Qualifying equipment must be purchased and installed in 2019 in order to receive a rebate.** Rebate applications must be received by Jan. 31, 2020, unless otherwise noted, to qualify for 2019 rebates. Applications can be submitted via email at rebateapplications@midamerican.com.

For prescriptive rebates, the rebate payment cannot exceed 50 percent of the installed cost (reasonable labor and material/equipment - reasonableness to be determined by MidAmerican Energy Company). Installed cost includes contractor labor only and does not include internal labor.

Heating, Cooling and Water Heating

Equipment	Qualification(s)	Customer Rebate
Natural gas furnaces - AHRI Certified®	<225 MBtuh and AFUE 95 or greater	\$300/unit
Furnace fans - AHRI Certified	Must be installed on a new qualifying furnace with AFUE 95 or above; <225 MBtuh; CEE air handling ratio of <0.02	\$50/unit
Central air conditioners - AHRI Certified	<65 MBtuh (coil and condenser must match)	
	SEER 15-15.9	\$50/ton
	SEER 16-16.9	\$100/ton
	SEER 17 and above	\$300/ton
Ductless minisplit air conditioners - AHRI Certified	<65 MBtuh	
	SEER 15-15.9	\$50/ton
	SEER 16-16.9	\$100/ton
	SEER 17 and above	\$300/ton
Room air conditioners - ENERGY STAR® certified		\$35/unit
Heat pump water heaters - ENERGY STAR certified MidAmerican Energy residential electric-only customers with no access to natural gas from any provider	≤55 gallons, UEF ≥2.0	\$300/unit
Air-source heat pumps - AHRI Certified	<65 MBtuh (coil and condenser must match)	
	SEER 15-15.9	\$150/ton
	SEER 16-16.9	\$200/ton
	SEER 17 and above	\$350/ton
Ductless minisplit air-source heat pumps - AHRI Certified	<65 MBtuh	
	SEER 15-15.9	\$150/ton
	SEER 16-16.9	\$200/ton
	SEER 17 and above	\$350/ton
Ground-source heat pumps - AHRI or ENERGY STAR certified Rebates are available for equipment meeting individual or combined qualifying efficiencies.	<135 MBtuh	
	EER 14.5-17.9	\$1,200/unit
	EER 18-22.9	\$1,800/unit
	EER 23 and above	\$2,400/unit
	AND/OR	
	COP 3-3.9	\$200/unit
	COP 4-4.9	\$400/unit
	COP 5 and above	\$600/unit
Programmable thermostats	Two or more set-backs; Wi-Fi and smart thermostats qualify	\$25/unit

HomeCheck®

A free on-site HomeCheck energy assessment to eligible customers of MidAmerican Energy; the energy expert may install free energy-saving items. MidAmerican Energy must provide the primary heating fuel to customer's home. Renters need owners' approval, home must be built before Jan. 1, 2009, and homes on farms are eligible. On-site assessment must be completed prior to insulation installation to qualify for a rebate. An on-site HomeCheck energy assessment must be completed by Dec. 20, 2019.

\$200 bonus available to customers who upgrade three qualifying recommended items by Jan. 31, 2020, after the assessment. Upgrades must be installed and rebate applications submitted by Jan. 31, 2020, to be eligible for the bonus payment.

Insulation

Equipment	Qualification(s)	Customer Rebate
An on-site HomeCheck assessment must be completed by Dec. 20, 2019, and before insulation projects can qualify for rebates. The assessor will determine the not-to-exceed rebate level during the HomeCheck assessment. All insulation projects must be completed and rebate applications postmarked by Jan. 31, 2020.		
Insulation	Attic/wall/kneewall	50% of total cost up to \$1,000
	Foundation/crawlspace	50% of total cost up to \$1,000
	Rim/band joist	50% of total cost up to \$0.70 per linear foot

Appliance Recycling

Equipment	Qualification(s)	Customer Rebate/Unit
Refrigerators	10 cubic feet or larger, no commercial sizes	\$50
Freezers	10 cubic feet or larger, no commercial sizes	\$50

Lighting

MidAmerican Energy works with many retail and manufacturing partners to provide discounted pricing on select ENERGY STAR certified LEDs and LED trim kits. The discounted pricing allows customers to receive the lower prices at the cash register and eliminates the need to fill out rebate forms. For a list of participating retailers, visit www.illinoisbebright.com or call 800-339-6856.

SummerSaverSM

SummerSaver is a voluntary program in which MidAmerican Energy installs a small cycling device on the outside of the home near the central air conditioning unit. This device allows MidAmerican Energy to cycle the air conditioner compressor off and on during peak usage weekdays from June through September.

Customers who participate in SummerSaver the entire cycling season receive a \$40 end-of-season bill credit on their October or November energy bill the first year of participation and a \$30 end-of-season bill credit in subsequent years. Prior to going out on a service call during this time period, please ask the customer if they are participating in MidAmerican Energy's SummerSaver program. If so, this may be why their home feels warmer than usual. Air conditioner compressors on customers' air conditioners or air-source heat pumps will cycle on and off during the SummerSaver cycling time period. Customers or HVAC dealers may call 800-437-2976 for more information.

Glossary

AFUE – Annual Fuel Utilization Efficiency: Ratio of annual heat output of the furnace or boiler compared to the total annual fossil fuel energy consumed by a furnace or boiler.

AHRI – Air-Conditioning, Heating and Refrigeration Institute: Provides standardized testing and certification of HVAC equipment.

COP – Coefficient of Performance: The ratio of the change in heat at the output, the heat reservoir of interest, to the supplied work.

EER – Energy Efficiency Rating: The ratio of the cooling capacity (in British thermal units [Btu] per hour) to power input in watts.

SEER – Seasonal Energy Efficiency Rating: Indicates the relative amount of energy needed to provide a specific cooling output.

UEF – Uniform Energy Factor: New energy efficiency rating for water heaters to replace EF (Energy Factor). A higher UEF means a water heater is more energy efficient and will cost less to operate.
