

# AT YOUR SERVICE

A MIDAMERICAN ENERGY NEWSLETTER

MAY 2026

## COMMITTED TO KEEPING ENERGY AFFORDABLE & RELIABLE

At MidAmerican, we're proud to offer some of the lowest electric rates in the country. In fact, our Iowa customers enjoy rates 44% below the national average.

As energy demand continues to rise here in the Midwest and across the nation, we're prepared to meet the needs of today's customers and those we'll serve in the future. This includes:

### PROTECTING YOU FROM COST SHIFTS

In our service area, large facilities, like manufacturing plants or data centers, pay for the new infrastructure and generation resources needed to serve them. This protects families, farmers and small businesses from bearing costs needed by some high-energy users.

### OFFERING TOOLS THAT HELP YOU SAVE

Our energy efficiency programs provide discounts and rebates for energy-saving equipment, online energy assessments and other incentives designed to help you use less energy and lower your bill. Programs vary by state.

### MAINTAINING A BALANCED MIX OF GENERATION RESOURCES

Our investments in clean wind and solar energy help keep costs down, while our coal and natural gas plants ensure you always have energy when you need it, no matter the weather.

### IMPROVING SYSTEM RELIABILITY

We're continually enhancing operational efficiencies and investing in technologies that reduce power outages and safeguard our grid from extreme weather.

Providing you with affordable, reliable and sustainable energy now and for decades to come is how we remain obsessively, relentlessly at your service.

# MAY IS ELECTRICAL SAFETY MONTH

Don't be shocked by the dangers of electricity. Knowing what to do when you encounter an electrical hazard can save your life.

- ▶ **Stay far away from overhead power lines.** You don't need to touch a high-voltage line to be at risk – even being too close can cause electrocution.
- ▶ **Always assume a power line is live and dangerous.** If you see a downed line, call our emergency line at 800-799-4443 right away.
- ▶ **Shuffle – don't walk or run – from a fallen power line.** Lifting your feet could create an opportunity for a shock.

## Smart summer savings!

Smart thermostats are easy to install and can be adjusted from anywhere via your smartphone. Plus, Iowa and Illinois customers can enroll in our SummerSaver<sup>SM</sup> program with a smart thermostat and earn an annual bill credit of up to \$40! Find deals on smart thermostats at [Marketplace.MidAmericanEnergy.com](https://www.marketplace.midamericanelectric.com) and start saving today!

**Preserving beautiful night skies**

We work tirelessly to keep the lights on, but in this case, we're working to keep the lights off... that is, the red nighttime aircraft warning lights on top of our wind turbines. We're planning to install aircraft detection lighting systems that will keep the flashing lights off more than 95% of the time across all our wind farms.

## Renewable Advantage 2025 Wrap-Up

The Renewable Advantage program is available to customers who want to donate to support to the growth of renewable energy in our service area. At the end of December 2025, MidAmerican's Renewable Advantage program had 424 monthly contributors and 15 one-time or periodic contributors. On average, monthly contributors gave \$3.74, and one-time or periodic contributors gave \$6.06. Thank you to all who supported this cause!
